REVIEW OF THE BOOK

"SYNTHETIC METHODS IN THE FIELD  
 OF ORGANOMETALLIC COMPOUNDS OF ARSENIC"

"Sinteticheskiye Metody v Oblasti Metalloorganicheskikh Soyedinenii Mysh'yaka", edited by R. Kh. Freydlina and published under the general supervision of A. N. Nesmeyanov, and K. A. Kocheshkov at the Publishing House of the Academy of Sciences USSR, 1945, is Volume VII of a series on organometallic compounds.

Although this review has been compiled chiefly on the basis of papers published in foreign periodicals, work done in Russia has also been covered. The contributions of Russian investigators to this field (particularly work done by A. N. Nesmeyanov and his collaborators) are rather valuable and important. This monograph is significant in that it has been prepared under the supervision of Nesmeyanov, who must be regarded as an authority on work done in Russia, and that articles published up to 31 December 1942 have been considered in writing the book.

To illustrate the scope of the work, the table of contents of Volume VII is given below:

TABLE OF CONTENTS

Part I. Methods of Synthesis of Organometallic Compounds of Arsenic Which Involve the Formation of C-As Bonds or a Change in the Number of Such Bonds

	<u>Page</u>
Chapter 1. Introduction	7
Chapter 2. Synthesis of Arsenic Organic Compounds by Means of Organic Compounds of Other Metals	15
A. By Means of Magnesium Organic Compounds	15
B. By Means of Mercury Organic Compounds	22
C. By Means of Zinc Organic Compounds	25
D. By Means of Alkali Metal Organic Compounds	26
Chapter 3. Interaction of Alkyl Halides and Other Alkylating Agents With Arsenic and Alloys of Arsenic	26
Chapter 4. Distillation of Salts of Carboxylic Acids With Arsenic Trioxide	27
Chapter 5. Interaction of Arsenic Trichloride With Halogen Substituted Compounds Under the Influence of Sodium (Reaction of Michaelis)	28
Chapter 6. Interaction of Salts of Arsenous Acid With Halogen Substituted Derivatives (Meyer's Method)	31
Chapter 7. Addition of Arsenic Trihalides and Aryl or Alkyl Dichlorarsines to Unsaturated Compounds	39
Chapter 8. Introduction of the As Atom	42
A. By Means of Arsenic Acid	43
B. By Means of Arsenic Trichloride	47
C. Intramolecular Arsenization	52
Chapter 9. Diazo Method	57
A. Synthesis of Aryl Arsonic Acids From Arylamines (Bart's Method)	58
B. Synthesis of Aryl Arsonic Acids From Arylamines According to Scaveller	72
C. Synthesis of Aryl Arsonic Acids From Aryl Hydrazines	75
Chapter 10. Interaction of Arsenic Organic Compounds With Halogen Compounds	77
A. Interaction of Primary and Secondary Arsines With Organic Halogen Compounds	78
B. Interaction of Tertiary Arsines With Organic Halogen Compounds	79
C. Interaction of Arseno Compounds With Organic Halogen Compounds	84

D.	Interaction of Tetraalkyl (Aryl) Diarsyls With Organic Halogen Compounds	85
E.	Interaction of Halogen Substituted Arsines With Organic Halogen Compounds	85
Part II.	Methods of Synthesis of Organometallic Compounds of Arsenic Involving a Change in the Function of the Arsenic Containing Group in the Molecule	
Chapter 11.	Oxidation	86
A.	Oxidation of Primary and Secondary Alkyl (Aryl) Arsines	86
B.	Oxidation of Tertiary Alkyl (Aryl) Arsines	88
C.	Oxidation of Arseno Compounds	91
D.	Oxidation of Tetraalkyl (Aryl) Diarsyls (Cacodyls)	95
E.	Oxidation of Compounds of the Type $RAsX_2$ or $R_2AsX_2$ into Arsenic Organic Acids ( $R =$ Radical, $X =$ Halogen, $CH_3$ , $SH$ , $\frac{1}{2}S$ , etc)	94
Chapter 12.	Reduction	99
A.	Reduction of Arsenic Organic Acids to Halogen Substituted Arsines or Arsine Oxides	100
B.	Reduction of Primary Arsenic Organic Acids and Arsine Oxides to Arseno Compounds	113
C.	Reduction of Dialkyl (Diaryl) Arsonic Acids and Dialkyl (Diaryl) Arsine Oxides to Tetra- alkyl (Aryl) Diarsyls	132
D.	Reduction of Arsonic Acids and Arsin Oxides to Arsines	135
E.	Reduction of Oxides of Triaryl Arsenic to Tertiary Arsines	139
Chapter 13.	Hydrolysis and Exchange of Anions	140
A.	Hydrolysis of the Acid Halides of Arsonic Acids of the Type $RAsX_2$ and $R_2AsX_2$ , Compounds of the Type $R_3AsX_2$ , Salts of Arsonium Bases, and Halogen Derivatives of Arsines	140
B.	Transformation of Organic Arsine Oxides into Halogenated Arsines, Cyanoarsines, and Arsine Sulfides	145
C.	Exchange of Anions in Compounds of the Type $RAsX_2$ and $R_2AsX_2$ --also in Salts of Arsonium Bases	147
D.	Esters of Alkyl (Aryl) Arsonic and Alkyl (Aryl) Arsenous Acids	151

Chapter 14.	Disproportionation and the Reverse Reactions	
A.	Reactions in the Reverse Direction to Disproportionation	153
B.	Disproportionation	155
Chapter 15.	Dealkylation and Dearylation of Arsenic Organic Compounds	156
A.	Thermal Decomposition of Trialkyl (Aryl) Dihalides and Dialkyl (Aryl) Trihalides of Arsenic	157
B.	Dearylation of Organic Arsenic Compounds as a Means of Determining the Position of the Arsenic Containing Group in the Molecule	160
C.	Decomposition of 10-Alkyl (Aryl)-5, 10-Dihydrophenarsazine Derivatives Under the Action of Hydrogen Chloride	162
Chapter 16.	Analysis	163
A.	Determination of Arsenic in Arsenic Organic Compounds	163
B.	Determination of Carbon and Hydrogen in Organometallic Compounds of Arsenic According to Dennstedt's Method	166
C.	Microassay of Arsenic in Organic Compounds	167
